

**GIL TAJHIZ**

**Radiant Infrared tube Heaters**

**Radiant ceramic heater**

**Industrial ceramic heater**

**Commercial ceramic heater**

**Patio ceramic heater**

**Floor standing radiant heater**

GIL TAJHIZ offers a broad selection of infrared tube heaters and high intensity heaters including indoor and outdoor gas radiant heaters. From warehouse heaters to car wash heaters, our team can help you pick the right combination of infrared heating products that best fit your application, while giving you maximum energy savings.

GIL TAJHIZ delivers unmatched performance minimizing wasted convective heat and delivering more comfort for your energy dollar. Our radiant infrared heaters are best for the environment too.

Purchase a GIL TAJHIZ overhead infrared heater and you'll experience our highly rated customer service, technical and design assistance plus outstanding durability for modern radiant heating systems.

## How do Radiant Infrared Heaters Work?

Traditional warm air heaters work by first heating all the air within a space before the warmth can be felt by anyone within that space.

Electric and gas infrared heaters are different. Radiant infrared heaters use infrared heat wave technology to immediately heat objects, imitating the way the sun heats the earth. This means our heaters can provide the same type of warmth as when the sun shines on a cool winter's day.

**Immediate Heating** – The infrared heat waves pass through the air so that the majority of heat generated by overhead infrared heaters can be absorbed by those below. As a result infrared radiant heaters provide an immediate heat source as opposed to warm air or convection heaters, which have a long lag time between activation and desired temperatures.

Compare GIL TAJHIZ electric overhead heaters and gas infrared heaters to other types of modern heaters and feel the difference for yourself.

## Ask Us about the GIL TAJHIZ Advantage

Our highly rated customer service has the quickest lead times, best on-time performance and the best overall quality in the industry.

All of our **high intensity heaters**, **radiant tube heaters** and **outdoor patio and stadium heaters** come backed by the GIL TAJHIZ Advantage which includes:

- Professional heat planning support
- Free design support
- Comprehensive warranty – 10 year ceramic burner; 3 year all other components

For more information about **GIL TAJHIZ Infrared Heaters** or any of our top rated infrared heating products, or for technical details regarding any particular infrared heater model please contact GIL TAJHIZ:

## GIL TAJHIZ Radiant Tube Heater Highlights

There are several outstanding product features that make a GIL TAJHIZ overhead radiant tube heater the best in the industry, including:

- Long lasting construction with corrosion resistant parts, sealed tube heaters and protected fans
- Easy maintenance with simple latch access [no need to turn off heater burner]
- Energy savings up to 50% offers payback period as small as 1 year
- Quiet “Whisper Jet” burners operate even lower than background noise
- Uniform heat distribution pressure fan for optimal heating of space

## Gas Fired Commercial Outdoor Heaters

**For Restaurants:** GIL TAJHIZ Overhead infrared outdoor heaters means more tables can be turned for better branding and bigger profits. GIL TAJHIZ outdoor heaters also help to keep the aisles clear, resulting in swifter table service and increased overall dining comfort. Choose between a GIL TAJHIZ mounted gas or propane outdoor heater and a parasol outdoor patio heater. And best of all, GIL TAJHIZ outdoor ceiling gas heaters never have to be handled by your staff!

**For Municipalities:** Infrared outdoor heaters are an affordable investment creating a more live-able city that boosts public use and the city’s reputation. Your fellow citizens will thank you for it.

**For Commercial Centers:** Infrared outdoor heaters help draw people in, keeping them longer and boosting the commercial value of your property.

**For Contractors, Engineers and Designers:** Infrared outdoor heaters can provide you with fresh ideas and new projects that will make your customers warm and tingly all over.

**For Stadium Operators:** Infrared outdoor heaters provide spectators with sensible comfort; fans can be heated for less than 5 cents per game.

## The GIL TAJHIZ Outdoor Patio Heater Difference

GIL TAJHIZ Heaters' offerings make choosing outdoor heaters easy and help keep your projects highly feasible and affordable. That's because of our unbeatable combination of:

- Product selection
- Lower operating costs
- Radiant efficiency

We also offer total support all the way from outdoor heater design assistance to follow up customer service.

At the heart of it all is GIL TAJHIZ's radiant heat efficiency, which is the amount of heat that actually warms people and not the surrounding air. Our powerful, efficient outdoor patio heaters can be hung as high as 200 feet overhead and still do their job.

## Outdoor Heater Applications

- Restaurant Patios
- Rooftop Decks
- Transit Shelters
- Public Spaces
